

GENERATOR DIESEL SUPPLY

Our Services

Generation Petroleum Limited are experts in Generator fuel delivery logistics. Our company will deliver, verify and meter the exact amount of fuel that you may require at your premises.

We have the most advanced state of the art, modern, mobile petrol delivery mechanism, where electronic dispenser pumps are mounted on small and easy to manoeuvre trucks (Home Lorry) that enables us to dispense fuel at any location whether above the ground, under or in the basement of any building. We can meter for you any amount of diesel which you may require, without charging any transport to your premises so long as it is within Nairobi city boundaries. Before filling in your generator with our diesel, we always first verify in your presence or your appointed agent, the quality of the fuel by use of hydrometer (this is a mandatory standard procedure). Upon receipt of your order, we dispatch the crew nearest to your premises as we have our small fuel dispenser tankers strategically positioned around the city for quick responses (usually within an hour after the request). Our delivery crews can for free, provide our clients with some administrative tasks such as registering the generator running hours and testing for rain water or other post delivery contaminations in the client generator.

Ordering for diesel

For price inquiries and delivery, you may contact our help line desk officer on **0712 444002** or **020 203 4575** or **0734 685227**. The help line number is functional on a 24 hour basis. On weekends and public holidays, we have standby trucks ready to serve you.

Our price

Our delivered price to your premises within the city of Nairobi is always lower than the petrol station pump prices. It is also lower than the government maximum recommended price. Please note that this being a government price controlled commodity, the price is subject to change anytime as the Kenya Government may advise and publish in the Gazette notice and the media.
